Pooled PCA

Figure: Percent variation explained by number of PC, PC's calculated across all fibers for all subjects, for a single region (Cingulum Parahippocampal L)

Pooled PCA

Subjects projected into first two PC's, by PTSD status

Figure: Each point represents 1 fiber, in PC coordinates, each plot contains all fibers in the Cingulum Parahippocampal for 1 subject. Top row non-PTSD, bottom row PTSD
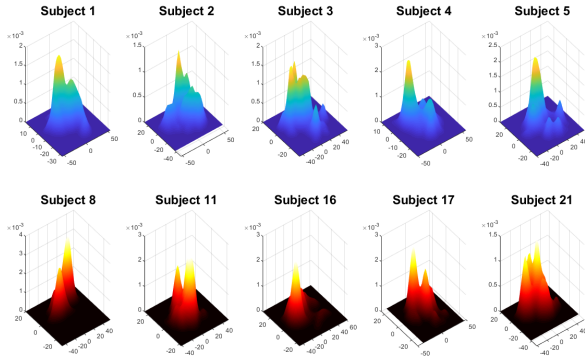

Pooled PCA

Figure: Top row non-PTSD, bottom row PTSD

Pooled PCA

Figure: ksdensities of data projected into 1 PC

Pooled PCA

Figure: Multiple alignment of ksdensities of data projected into 1 PC
